

Modify User's Access Role

How to modify an existing LINK® ID

Modify User's Access Role

There are 2 ways an LSA can modify a user's access:

1. From LINK menu go to the User Security > Local User Access List.
2. From LINK menu go to the User Security > Local User Maintenance Screen.

Modify User's Access Role (Local User Access List)

Local User Access List

- This will bring up all active LINK Id's under the LSA employed by.
- If you are a shared LSA you can use the “Employed By” dropdown to switch companies.

Modify User's Access Role (Local User Access List)

- Find the LINK Id and type in the "User ID" box or LSA can double click in the "User ID" box and it will bring up the "User Lookup" popup where LSA can search and select the user.

The screenshot displays the LINK System Customer Interface. At the top, there is a navigation bar with the ENBRIDGE logo and links for LINK Learning, Training, Tutorials, Contact Us, and Logout. The main header shows the system version (8.84.01), login information (TSTJTSJPIPELINE), and the current page (Local User Access List). The date and time are 2/26/2026, 2:20:16 PM CST. Below the header, there are several filters: a "User ID" search box (highlighted with a yellow box), "Service Provider" and "Company Name" dropdown menus (both set to [ALL]), and an "Employed by" dropdown menu (set to JS PIPELINE COMPANY). The main content area is a table with columns: User Id, User Name, Employed By, Company Name, Service Provider, Role Name, Access Type, Eff From Date, Eff To Date, and Role Description. A "User Lookup" popup window is open, showing search fields for User ID, First Name, Last Name, and Status (set to Active), and an "Employed By Svc Rest Name" dropdown (set to JS PIPELINE COMF). The popup also contains a table with columns: User ID, First Name, Last Name, Status, and Employed By. The table lists three users: TSTDORISRUCK (DORIS RUCKER, BROWNBEAR, ENABLED, JS PIPELINE), TSTFCJSPIPE (FRAN CARPENTER, BROWNBEAR, ENABLED, JS PIPELINE), and TSTJTSJPIPELINE (JOYCE SCHUBRICK, TEXAS, ENABLED, JS PIPELINE). The first row is highlighted in yellow. At the bottom of the popup, there are "Search", "select", and "Cancel" buttons.

Modify User's Access Role

- On the “Local User Modify Access” screen, LSA can click the “Retrieve” button, and it will retrieve all roles for all business units and companies the LSA can give access to.
- Any roles that is marked “Allowed” will display in blue.
- Or LSA can filter by using the Service Provider, Company Name, Role ID filters to narrow what access is needed for what business unit or company(s).

Modify User's Access Role (Local User Maintenance)

Local User Maintenance

- This will bring up all active LINK Id's under the LSA employed by.
- If you are a shared LSA you can use the "Employed By" dropdown to switch companies.
- You can use the filters to find the LINK ID LSA wants to modify access to.
- Click on the LINK ID and then click on "User Access" button and it will take you to the "Local User Access List".
- Follow instructions on granting access by going to slides 2 through 10.
